Excursion to Walyunga National Park

My best experience of the day was climbing the rock. Some of the rocks were bunched together in the middle of the Avon River providing fabulous climbing. There was also a mini waterfall which was calming to watch. I was trying to challenge myself by hopping quickly on the miniature rocks.

Emily

I learnt that the water in the river is really salty and when we tested it the measurement was 16.8ms.

Kasey

Rishi, Akhil and Nikolas discussing and recording: Things we liked, disliked and wanted to change at Walyunga. There were some interesting suggestions.
My best experience of the day was the drawing on the rocks, and I found the perfect spot with the perfect view.

Kwani

I didn’t know that the foam on the water is poisonous to eat.

Mahki

Over all it was a really fun Educational day.
Thank you Mrs van der Linden, Mrs Lovering Mrs Manikam and Linley for making this fun day happen.
